

Innovative Engineering Competition

an event for university students in Budapest

INEC

INNOVATIVE ENGINEERING COMPETITION

Who are we?

We are the nonprofit organization BEST, that works to enhance engineering students' abilities and expose them to an international environment. Our organization is the local group of the Board of European Students of Technology (BEST). We have been holding major European engineering competitions (EBEC) for the past 15 years, and each year we reach thousands of gifted students, from a wide range of engineering and IT backgrounds.

What is INEC?

The goal of INEC is to highlight real-world scenarios that young engineers may encounter early in their careers. Teams of (up to) four students can enter the competition. The teams take on the several challenges that make up the competition. Professionals from our partners assess the outcomes based on a pitch or documentation.

What is a Challenge at INEC?

At INEC, challenges take the form of 30- to 90-minute tasks assigned by our partners. Company representatives present the task, and then work hours begin. A challenge is a brief task that needs to be solved, like documenting an unfamiliar code or coming up with ideas for a problem and many more. Every challenge is designed by our partners.

Our Offer	Media	Career	INEC Partner	Major INEC Partner
Company promotion with logo placement in online and offline materials				
Presence at the venue and chance to setup a rollup, poster or booth at the event				
Presentation during the event for all the participants (10 minutes)
